Summary

Software Developer and AI Automation Specialist focused on building scalable AI systems that replace manual, time consuming processes with reliable automation. Designs end to end AI solutions that convert complex data and workflows into actionable insights, automated decisions, and efficient operations.

Education

Comsats University Islamabad

Bachelor's in Computer Science (2021-2025)

Professional Experiences

• **Paramount Intelligence** | *AI Automation Expert (Dec 2025 – Present)*

Automations: Candidate Assessment System in n8n, Automated hiring process of PI in Airtable.

Web Scrapping: Scrapped 42 websites in ParseHub & Python, built Webscraping of Catalant in Python.

Development: ParseHub Monitoring System, Ads Generator, Website of PI.

• **CareCloud** | *Junior Software Developer (May 2025 – Nov 2025)*

Lead the project, all in one Portals for a school containing 5 different user portals with AI Models integration.

• **Internship: CompliXen** | *Full-Stack Developer (Apr-May 2025)*

Efficiently developed and optimized a web application, demonstrating proficiency in coding and debugging.

• **Freelancing** | *Full-Stack Developer (2023-2025)*

Built and deployed multiple full-stack projects for clients using React, Node.js, and MongoDB.

Projects

le'Elysian | *NextJs, NodeJs, AuthJs, Prisma, PostgreSQL,*

- Implemented role-based authentication and secure payment workflows.
- Built real-time product comparison and a centralized dashboard for sellers.
- Designed modern, responsive UI with Next.js and Tailwind CSS.

PerspectivePulse | *React, NodeJS, MongoDB*

- Developed a dynamic blogging platform with JWT-based authentication.
- Integrated Redux for global state management and seamless data handling.

Technical Skills

- | | |
|---------------------|---|
| • Languages: | JavaScript, Typescript, Java, Python, Git |
| • Databases: | MongoDB, MySQL, PostgreSQL, Firebase |
| • Tools: | Airtable, n8n, ParseHub, Insomnia, GitHub, Figma, Canva |
| • Frameworks | ReactJs, NextJs, Node, .net |

Open Source

HealthHelp | *NextJs, NodeJs, MongoDB, n8n, cloudinary*

hacktoberfest '23

- Helped in designing the required interfaces including 6+ independent routes.
- Created and resolved **GitHub issues**, resolved merge conflicts.
- Integrate the **cloudinary** to host the production level images and pdfs for doctors and patients.
- Integrated **n8n workflow** of documents evaluation.

LMS | *Project Management, GitHub, RESTful APIs, Collaboration*

- Developed and managed over **70 API routes**.
- Created and resolved **29 GitHub issues**, merged **32 pull requests**, and handled complex conflicts.
- Managed and coordinated **70 student contributors**, conducting vivas to assess their work.
